Dictionary ADT Implementation Used	Word-concordance Program Execution Time (seconds)
Python dictionary	
ChainingDict (hash table sizes 2**15 = 32768)	
OpenAddrHashDict with linear probing (hash table sizes 2**15 = 32768)	
OpenAddrHashDict with quadratic probing (hash table sizes 2**15 = 32768)	
Dictionaries implemented using BSTs	*(Warning: might take 5 - 10 minutes to finish!)*
Dictionaries implemented using AVL trees
